DETAILED ACTION

1. This communication is responsive to Amendment filed 06/05/2006 and Pre-Brief Conference filed 10/02/2006.
2. Claims 1-22 are pending in this application. Claims 1 and 22 are independent claims. This Office Action is made non-final.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
4. Claims 1-21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Re claim 1, the limitations "via inputs to a number...the number of MISRs" in lines 3-6 are unclear how the randomly sampling data on the microprocessor buses is related to the input data of the MISRs. For examination purposes, the examiner considers the limitations as randomly sampling data transmitted over a number of microprocessor buses; inputting the sampling data to a number of MISRs to generate values; and retrieving the values from the number of MISRs for generating random number.

Thus, claims 2-21 are also rejected for being dependent on the rejected base claim

1.

Claim Rejections - 35 USC § 101

5. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

6. Claims 1-21 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claims 1-21 cite a method of generating a random number in accordance with a mathematical algorithm. In order for claims to be statutory, claims must either include a practical/physical application or a concrete, useful, and tangible result. However, claims 1-21 merely disclose steps/components for generating a random number without further disclosing a practical/physical application or tangible result. The claims 1-21 are preemption every practical application. Therefore, claims 1-21 are directed to non-statutory subject matter.

Allowable Subject Matter

7. Claim 22 is allowed.

Response to Arguments

8. Applicant's arguments with respect to claims 1-21 have been considered but are moot in view of the new ground(s) of rejection.
